Dear Sir:

APPLICATION FOR JOB POSITION

I have applied for a position as a **front-end web developer** at your company.

Since this will not be my first time working with a team in the field as a front-end developer, I believe I'm perfect for the position. My frontend skills include;

HTML

CSS

JavaScript and jQuery programming

React.js framework

I have also succeeded with a real-time project as a freelancer, check url:

<https://bit.ly/2XV0rQQ>

Few others were created at my SIWES firm where I signed documents not to disclose projects to anyone for any reason.

I have attached a file containing my CV, with all necessary details included.

Whatever your decision, please accept my sincere thanks for your time and consideration of my request.

Sincerely,

Bolaji Matthew.
